

The product range for poultry breeding is born to make the rearing of the hens, pheasants and birds easier. The most important purpose of our articles is to avoid birds contact and pecks.

PHOTO	CODE	ARTICLE	DESCRIPTION	USE
	A004	ARROW	Universal arrow in transparent nylon.	To block glasses and cover-beaks.
	A005	SMALL RING	Nylon ring for hens and small birds.	If applied on the beak, it will avoid its closing. The bird can eat without pecking the other animals.
	A006	BIG RING	Nylon ring for pheasants and birds of average size.	If applied on the beak, it will avoid its closing. The bird can eat without pecking the other animals.
	A003	HEN GLASSES	Polyethylene glasses for hens and small birds.	If applied on the beak and blocked with the arrow, the animal can only look down to eat.
	A002	PHEASANT GLASSES	Polyethylene glasses for pheasants and birds of average size.	If applied on the beak and blocked with the arrow, the animal can only look down to eat.
	A007	SMALL COVERBEAK	Polypropylene cover-beak for hens and small birds.	If applied on the beak and blocked with the arrow, it allows the animal to eat without peaking the other birds.
	A008	BIG COVERBEAK	Polypropylene cover-beak for pheasants and birds of average size.	If applied on the beak and blocked with the arrow, it allows the animal to eat without peaking the other birds.
